### JOB DESCRIPTION

McCue Engineering Contractors is seeking a **Production Supervisor (Full-time, Permanent)** for its Delta, BC manufacturing facility. The Production Supervisor will manage the manufacturing team and act as a liaison between the Manufacturing and Engineering team to ensure an accurate and quality product is delivered on time and on budget.

Your responsibilities will include but not limited to:

- Planning the production schedule.
- Management of the production team – including hiring, appraising, training, and disciplining when necessary.
- Assigning production tasks to team members, taking account of production needs, materials availability, and individual capabilities.
- Maintain Quality Control
- Interpret design drawings and discuss design variations with the engineering team
- Identify issues and report to senior management.
- Conduct reviews of the production processes to try to identify areas for improvement.
- Ensure production processes are being conducted in line with company policies
- Ensure production team has access to all relevant materials and equipment to ensure the smooth running of production
- Ensure that production team and equipment are fully compliant and up to date with training
- Ensuring production downtime is kept to a minimum

---

### QUALIFICATIONS

In addition to a driver’s licence, applicant should have the following experience and/or qualifications:

- Minimum 2 years relevant experience.

---
